

7th August 2023

Letter of Recommendation: Niven Dias

I have known Niven since September 2020 when he took my Introduction to Multimedia module as part of his BSc Games and Multimedia Environments (GAME) degree here at Sussex. Niven also took my second year Game Development module and completed his final year project under my supervision. Although the degree is applied to game development, students cover the standard computer science background subjects and also produce a significant amount of code.

Niven showed excellent motivation during his studies and had a conscientious attitude to his work, which was of a very high academic. He has shown an excellent level of problem-solving skills, general computing subject knowledge and both game development and programming ability. Niven graduated in July 2023 with a 1st class honours degree.

Niven has demonstrated key abilities for both independent study and group work during his degree and his written and spoken English is excellent.

I would highly recommend Niven.

Yours sincerely

Dr Paul Newbury
Senior Lecturer in Multimedia Systems
